# Explanation of the Application

This application is designed for students with the aim of assisting them in the university entrance exams. What we have in mind; a student goes to a bookstore and buys a mathematic textbook, later he comes home and solves it. After solving it, he forgets at what point he was wrong. How many mistakes did he have on a subject or subjects? Thanks to this mobile application, a student will be able to mark each of his answers of each question onto the system. The system automatically retains which answer of a student is true or false and how much times elapses until a student answers a question. After that, the mobile application demonstrates data in graphics as they accumulate, acting as an assistant. It lists the subjects on which a student failed more and the subjects he spent too much time on. By using web service, an admin registers the each correct answer of the questions on the textbook to the system after introducing the textbook to the system.

A student can also calculate his or her point. The formula for the point calculation is explained on the slides. He should take photos of the incorrectly answered questions and their solutions and save them onto the application. After a while, a student can create a PDF document containing the photos of only the questions s/he failed to answer and the ones s/he uploaded their photos and can solve those questions.

Some teachers can assign homework to the relevant students through web service and a student can send a teaching request to the teacher who assigned the homework.

Below these are buttons for 'Genel' (General), 'Son Deneme' (Last Exam), and 'Son 5 Deneme' (Last 5 Exams). There are also dropdown menus for 'Sınav Seç' (Exam Selection) and 'Ders Seç' (Subject Selection).

The main area displays three line graphs:

- Tüm Denemeler**: A blue line graph showing the number of net answers over time. The Y-axis ranges from 0 to 300. The graph starts at approximately 300, dips to around 250, rises to 300, dips again, and then rises sharply to about 350.
- En Çok Zaman Harcadığım 10 Konu**: A red line graph showing the time spent on the top 10 subjects. The Y-axis ranges from 0 to 120. The graph shows several peaks, with the highest being around 122 for Matematik.
- En Çok Yanlış Yapdiğim 10 Konu**: A green line graph showing the number of mistakes made on the top 10 subjects. The Y-axis ranges from 0 to 120. The graph shows several peaks, with the highest being around 122 for Matematik.

At the bottom left, there is a pie chart showing the distribution of solved problems by type: Canlılar (Orange), İntegral (Red), Köklü Sayılar (Blue), Üstü Sayılar (Purple), and Türev (Yellow).

On the right side of the interface, there are three large blue arrows pointing right, labeled:

- 3- HOME
- 3.2- PRACTICE EXAMS

Blue arrows point from the text descriptions below to the corresponding parts of the application interface.

**The correct answer number in the practice exams** points to the 'Tüm Denemeler' line graph.

**Number of net answers in practice exams** points to the 'Tüm Denemeler' line graph.

**Horizontal Column; All practice exam data entered in 1 year. No text will be written in the bottom column** points to the 'En Çok Yanlış Yapdiğim 10 Konu' and 'En Çok Çözdüğüm 5 Konu' line graphs.

The image shows a screenshot of the Çözüm Kupü mobile application. At the top, there's a navigation bar with icons for home, search, statistics, and help. The main header says "Çözüm Kupü". Below the header, there are two tabs: "SORU BANKALARI" and "DENEMELER". The "DENEMELER" tab is selected, showing three buttons: "Genel", "Son Deneme", and "Son 5 Deneme" (which is highlighted in orange). Below these buttons are dropdown menus for "Sınav Seç" and "Ders Seç". A large section titled "Son 5 Deneme" displays a line graph of scores over five exams. The graph has a blue line for the first exam and a green line for the second exam. The x-axis is labeled "Deneme 1" through "Deneme 5". To the left of the graph, there are three tables: "En Çok Zaman Harcadığım 10 Konu", "En Çok Yanlış Yaptığım 10 Konu", and "En Çok Çözdüğüm 5 Konu". Each table lists subjects like Matematik and Türkçe with their respective times or counts. At the bottom left is a pie chart. The bottom navigation bar includes links for "Ara Sayfa", "Sınavlar", "Denemeler", and "Üzüntü".

1.  $5^4 + 5^4 + 5^4 + 5^4 + 5^4$ 

toplamanın sonucu aşağıdakilerden hangisidir?

- A)  $5^{20}$     B)  $5^5$     C)  $5^4 \cdot 4$     D)  $5^{1024}$

**ÇÖZÜM 1:**

$$5^4 + 5^4 + 5^4 + 5^4 + 5^4 = 5^4(1 + 1 + 1 + 1 + 1)$$

$$= 5^4 \cdot 5 = 5^{4+1} = 5^5$$

Cevap B şıkkıdır.
