--Practices Exam set

The average of all practices booklet scores in the practices exam set is calculated. Average score for Practices exam set = (Sum of booklet points in the set / Number of booklets)

**Practices exam booklet-1

With the score calculation formula, points must be calculated for each booklet. The score calculation formula is shown graphically below.

++Booklet Test-1

Success ranking for booklet test = (Number of correct / Number of all questions in the test) * 100
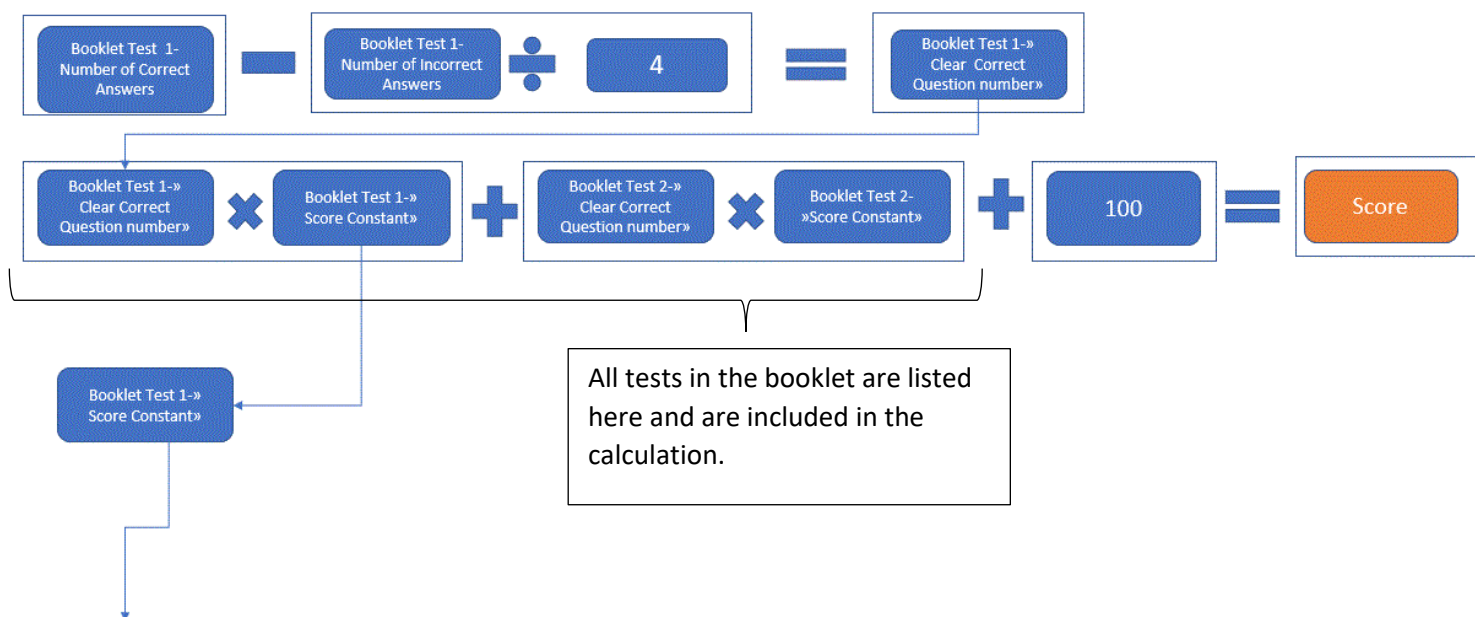

for example: (15/40) * 100 = 37.5%

++Booklet Test-2

++Booklet Test-3
